"Über das Produkt The Riemann hypothesis is considered the most important and intriguing open problem in mathematics. Not only fame, but also a million dollar prize awaits whoever proves it. This book introduces readers to the universe of prime numbers, infinite sequences, infinite products and complex functions that lies behind the hypothesis. Über den Autor und weitere Mitwirkende Roland van der Veen is a Research Fellow at the University of Amsterdam and a member of the Royal Dutch Mathematical Society. Jan van de Craats is Professor Emeritus at the University of Amsterdam. He is a member of the Royal Dutch Mathematical Society and the Dutch Association of Teachers of Mathematics, the author or co-author of more than ten books in Dutch, and a four-time leader of the Dutch team at the International Mathematical Olympiad."
