"Críticas ""If every home were fully retrofitted with all the projects in this book, we would be well on our way to water security and watershed recovery."" -- Brock Dolman, director of Occidental Arts and Ecology Center's WATER Institute ""This book is the real deal. Laura Allen lives, practices, and teaches what she writes about. I've used her water-harvesting systems and composting toilets, along with those of many of her students, colleagues, and mentors -- they all work wonderfully! Read this book, and yours could too."" -- Brad Lancaster, author of Rainwater Harvesting for Drylands and Beyond Reseña del editor The book describes the water crisis-national and global, present and future - and then presents options for saving water through conservation, creating a water-wise landscape, and creating water-conserving systems. It offers detailed, illustrated instructions on creating systems to reuse greywater, harvest rainwater, and set up a waterless composting toilet.

Contraportada Even as severe droughts become more common and the water crisis heats up worldwide, you can radically reduce water use in your own home. Laura Allen is your expert guide to building systems that conserve and reuse water while saving money and meeting the needs of your home and garden. These practical, low-tech solutions are an essential part of our new water future. Biografía del autor Laura Allen is the author of The Water-Wise Home and cofounder of Greywater Action, a collaborative of educators who teach residents and tradespeople about affordable and simple household water systems that dramatically reduce water use and foster sustainable cultures of water. She leads classes and workshops, including the first training program for professional greywater installers, and participates in writing state government greywater and composting toilet codes. She lives in Eugene, Oregon."
