"Klappentext In 2000, Ilchi Lee's Healing Society (Hampton Roads, 2000) became Amazon's number one bestseller one month after publication. It ignited a movement across the world for Healing Society in Action, whose participants taught holistic health to elders and children, held conferences to promote peace. Healing Society introduced thousands of readers to Dahnhak, Brain Respiration, and Lee's revolutionary perspective on mass enlightenment. In Human Technology, Lee now offers you his essential teachings distilled from a lifetime of study. Lee presents principles and skills for managing the core issues of life: health, sexuality, and life purpose. He also explains his understanding of the brain as the master controller of our lives. Using the toolkit of Human Technology will help you live creatively and authentically. In the name of comfort and security, we have created increasingly complex systems that demand our lives for their maintenance. Systems cannot answer life's most important questions?only you can. The ultimate goal of education, institutions, and expertise should be self-education. Only then will technology serve humanity rather than reign over us. Human Technology contains the principles and tools that can return us to self-mastery and the life well lived. Über den Autor und weitere Mitwirkende Ilchi Lee has dedicated his life to health and peace education. In 1980 Lee undertook an intensive twenty-one-day meditation on Mount Moak in South Korea, which culminated in his spiritual awakening to a philosophy of enlightened action. Lee is the founder of Dahnhak and Brain Respiration, integrative mind-body training programs. He is also the founder of the Healing Society and Earth Human Movements. Lee has authored twenty-eight books, including Healing Society, The Twelve Enlightenments for Healing Society, and Brain Respiration."
